# Journal of Microscopy

*Patron:* HER MAJESTY THE QUEEN

*Officers and Council 1969*

*President:* R. BARER

*Vice-Presidents:*

J. DYSON FRS

A. G. E. PEARSE

*Hon. Treasurer:* P. J. STOWARD

*Hon. Secretary:* G. L'E. TURNER

*Ordinary Members of Council:*

C. W. M. ADAMS

E. J. AMBROSE

G. W. CAUSEY

C. J. COOK

P. M. DANIEL

P. ECHLIN

R. W. HORNE

A. J. LACEY

P. R. LEWIS

R. M. H. McMINN

D. W. PASHLEY, FRS

B. RALPH

J. SIKORSKI

P. THROWER

E. R. WEIBEL

*Hon. Joint Editors:*

R. ROSS

G. C. AMSTUTZ (Stereology)

G. A. MEEK

*Hon. Curator of Scientific Collection:*

S. BRADBURY

*Hon. Librarian:* SUSAN ELLIS

*Hon. Keeper of Films:* D. J. TREVAN

*Hon. Asst. Keeper of Films:* W. PYBUS

# Contents of Vol. 89

|  |     |
|--|-----|
| AUDREY M. GLAUERT and J. A. LUCY. Electron microscopy of lipids: effects of pH and fixatives on the appearance of a macromolecular assembly of lipid micelles in negatively stained preparations | 1   |
| D. J. GOLDSTEIN. Detection of dichroism with the microscope  | 19  |
| G. C. FARNELL and R. B. FLINT. Low-contrast development of electron micrographs  | 37  |
| J. G. RICHARDS. The structure and formation of the egg membranes in <i>Nasonia vitripennis</i> (Walker) (Hymenoptera, Pteromalidæ)   | 43  |
| GRACE M. JEFFREE. Demonstration of $\beta$ -glucuronidase with naphthol AS-BI- $\beta$ -D-glucosiduronic acid by simultaneous coupling   | 55  |
| DONALD S. SKENE. The effect of refractive index of the mounting medium on the apparent diameter of latex particles and glass fibres  | 63  |
| GLEN B. HAYDON. Electron phase and amplitude images of stained biological thin sections  | 73  |
| U. WELSCH, E. FLITNEY and A. G. E. PEARSE. Comparative studies on the ultrastructure of the thyroid parafollicular C-cells   | 83  |
| HOLDE PUCHTLER, FAYE SWEAT, MARY S. TERRY and H. M. CONNER. Investigation of staining, polarization and fluorescence-microscopic properties of myoendothelial cells                              | 95  |
| IAN CARR, J. A. CLARKE and A. J. SALSBUURY. The surface structure of mouse peritoneal cells—a study with the scanning electron microscope  | 105 |
| S. A. HODSON. Light-microscopic radioautography utilizing Araldite sections  | 113 |
| G. L. ROGERS. Fourier images in electron microscopy and their possible misinterpretation   | 121 |
| G. L. ROGERS and J. PALMER. The possibilities of X-ray holographic microscopy  | 125 |
| D. TARIN and A. T. SPENCER. Histological control of specimen selection for electron microscopy   | 135 |
| S. R. APARICIO and P. MARSDEN. A rapid methylene blue-basic fuchsin stain for semi-thin sections of peripheral nerve and other tissues   | 139 |
| A. THETFORD and S. C. SIMMENS. Birefringence phenomena in cylindrical fibres   | 143 |
| ALEXIS L. BURTON. A simplified time-lapse cinemicrographic unit  | 151 |
| Reviews  | 159 |
| E. E. UNDERWOOD. Stereology, or quantitative evaluation of microstructures   | 161 |
| P. R. LEWIS and C. C. D. SHUTE. An electron-microscopic study of cholinesterase distribution in the rat adrenal medulla  | 181 |

|   |     |
|---|-----|
| J. P. WATERHOUSE and C. A. SQUIER. Measurements from electron micrographs of organelle size in relation to their shape: a refinement applied to the epidermal melanosome and basal lamella  | 195 |
| M. PLUTA. A phase-contrast device with positive and negative image contrast   | 205 |
| H. MAGILL and B. GUNNING. A simple microtome capable of cutting sections of plastic-embedded material down to 1 $\mu\text{m}$ in thickness  | 217 |
| G. C. COX. Ultra-thin sectioning artifacts resembling plasmodesmata   | 225 |
| G. ROWDEN. A method of obtaining stained electron-microscope specimens free from contamination  | 229 |
| DAVID W. GREGORY. A clamp to hold electron-microscope grids for shadowing   | 233 |
| A. THAER. The refractive index and dry mass distribution of mammalian erythrocytes  | 237 |
| GLEN B. HAYDON. Visualization of substructure in ferritin molecules: an artifact  | 251 |
| W. KENCHINGTON and N. E. FLOWER. Studies on insect fibrous proteins: the structural protein of the ootheca in the praying mantis, <i>Sphodromantis centralis</i> Rehn   | 263 |
| K. W. J. TREADAWAY. Studies of steel fracture by transmission and scanning electron microscopy  | 283 |
| K. SMITH. A method of processing third-stage larvæ of the nematode <i>Trichostrongylus colubriformis</i> for electron microscopy  | 287 |
| <i>Letter to the Editor</i>   |     |
| S. C. SIMMENS. Refractive-index measurements on birefringent material by interference microscopy  | 291 |
| Review  | 293 |
| I. MANTON, K. KOWALLIK and H. A. VON STOSCH. Observations on the fine structure and development of the spindle at mitosis and meiosis in a marine centric diatom ( <i>Lithodesmium undulatum</i> ). I. Preliminary survey of mitosis in spermatogonia | 295 |
| A. G. E. PEARSE and F. W. D. ROST. A microspectrofluorimeter with epillumination and photon counting  | 321 |
| HOLDE PUCHTLER, FAYE SWEAT WALDROP, MARY S. TERRY and H. M. CONNER. A combined PAS-myofibril stain for demonstration of early lesions of striated muscle  | 329 |
| P. F. MILLINGTON, D. R. CRITCHLEY, P. W. A. TOVELL and R. PEARSON. Scanning electron microscopy of intestinal microvilli  | 339 |
| IAN A. OLSON and DOROTHY E. SKUSE. The use of liquid photographic emulsion for demonstrating blood vessels in histological sections   | 345 |
| P. S. HEWLETT. Visibility and resolution of period structure in oblique dark-ground illumination: images of diatoms with rectangulate and triangulate arrays of fine structure  | 349 |
| W. SMITH, E. W. GRAY and J. M. K. MACKAY. A sandwich-embedding technique for monolayers of cells cultured on Araldite   | 359 |

*Short Technical Notes*

|  |     |
|--|-----|
| B. J. DUGGAN and G. W. GREENE. Increasing the camera constant of the EM6 microscope                                | 365 |
| W. J. HENDERSON. A simple replication technique for the study of biological tissues by electron microscopy         | 369 |
| STUART HODSON and J. MARSHALL. A device for trimming frozen biological tissue preparatory to ultra-thin sectioning | 373 |
| ROBERT S. DE SANTO. A simple cooling device for thin paraffin sectioning   | 377 |

**Journal of Microscopy Volume 91 No. 2**

Through an unfortunate misunderstanding some overseas subscribers to *Journal of Microscopy* will have received copies of *Monthly Notices of the Royal Astronomical Society* Volume 148 No. 2. We are enclosing this note with all copies of *Journal of Microscopy* Volume 91 No. 2 going abroad, partly to convey our apologies for this mistake to subscribers so affected, and partly to seek their co-operation in returning the copies of *Monthly Notices* sent to them in error. We shall be most grateful if any such copies can be addressed to us at 108 Cowley Road, Oxford.

Blackwell Scientific Publications Ltd.

# Index of subjects

Adrenal medulla, cholinesterase in, 181  
Araldite, embedding technique, 359  
Araldite sections, 113  
Artifacts: in electron micrographs, 225  
    in ferritin substructure, 251  
Autoradiography, 113

Basic fuchsin, 139  
Birefringence, of fibres, 143  
Blood vessels, demonstration of, 345

Camera constant of EM-6B, 365  
Cells: cultured on Araldite, 359  
    erythrocytes, dry mass of, 237  
    intestinal, 339  
    melanosomes, epidermal, 195  
    mouse peritoneal, 105  
    oocyte, 43  
    ootheca of praying mantis, 263  
    spermatogonia, 295  
    striated muscle, 329  
    thyroid-C, 83  
Cholinesterase in adrenal medulla, 181  
Cinematography, time-lapse, 151  
Clamp, shadowing, for grids, 233  
Cooling device for paraffin blocks, 377  
Counting, photon, 321

Dark-ground illumination, 349  
Diatoms: resolution of periodic structure, 349  
    spindle in mitosis and meiosis, 295  
Development, low contrast, 37  
Dichroism, 19  
Dry mass of erythrocytes, 237

Electron microscopy: camera constant of EM-6B, 365  
    cholinesterase in adrenal medulla, 181  
    diatom, mitosis and meiosis in, 295  
    Fourier images, 121  
    histology, 135  
    lipids, 1  
    low-contrast development, 37  
    melanosomes, 195  
    membranes, 1  
    organelle size and shape, 195  
    phase and amplitude images, 73  
    section staining, 73  
    specimen selection, 135  
    replication technique, 369  
Embedding, sandwich technique, 359  
Emulsion, liquid photographic, 345  
Epi-illumination, 321

Ferritin, artifact in substructure, 251  
Fibres, birefringence in, 143  
Fibrous proteins, insect, 263  
Fluorescence microscopy, of myoepithelial cells, 95  
Fourier images, 121  
Frozen sections, ultra-thin, 373

Glucuronidase, 55  
Grids, clamp for shadowing, 233

Holography, X-ray, 125

Image, electron phase and amplitude, 93  
Interference microscopy of birefringent material, 291  
Interpretation of Fourier images, 121

Latex particles, 63  
*Lithodesmium undulatum*, 295

Membranes, egg, 43  
Methylene blue, 139  
Micelles, 1  
Microspectrofluorimeter, 321  
Microtome, simple, 217  
Microvilli, 339  
Mitosis and meiosis in diatom, 295  
Muscle, striated, lesions in, 329

Naphthol AS-BI- $\beta$ -D-glucosiduronic acid, 55  
*Nasonia vitripennis*, 43  
Negative staining, 1  
Nematode larvæ, 287  
Nerve, staining peripheral, 139

Paraffin sections, cooling device for, 377  
Particles, latex, 63  
pH, effect on fixatives, 1  
Phase contrast, positive and negative, 205  
Photon counting, 321  
Photographic emulsion, liquid, 345  
Plasmodesmata, artifacts resembling, 225  
Polarization of myoepithelial cells, 95  
Praying mantis, ootheca, 263  
Processing nematode larvæ for electron microscopy, 287

Refractive index, 63  
Refractive index, distribution in erythrocytes, 237  
Refractive index of birefringent material, 291

Scanning electron microscopy: intestinal microvilli, 339  
    mouse peritoneal cells, 105  
    steel fractures, 283  
Sections, artifacts in, 225  
Sections, staining semi-thin, 139  
Shadowing clamp for grids, 233  
Spermatogonia, mitosis in, 295  
*Sphodromantis centralis*, 263

Spindle, development of, 295  
Stain, for striated muscle, 329  
Stain, methylene blue-basic fuchsin, 139  
Stain, PAS for myofibrils, 329  
Staining, of myoepithelial cells, 95  
Stereology, 161  
Structure, periodic, in diatoms, 349

Time-lapse cinematography, 151  
Trimmer for tissue blocks, 373

Ultrastructure: of egg membranes, 43  
of thyroid parafollicular C-cells, 83

X-ray holography, 125
